 the 3 boxes with a high degree of conservation.

FIG. 9

Figure 1 shows a schematic representation of a 1200 bp DNA fragment. The fragment is divided into 12 regions labeled A through L. Regions A, B, C, D, E, F, G, H, I, J, K, and L are shown as horizontal bars with varying lengths and internal markings. Region A is the longest, followed by B, C, D, E, F, G, H, I, J, K, and L. The fragment is flanked by two short segments labeled 'A' and 'B'.
